

LAMAR | INSTALL READY EXTENSIONS

Pre-assembled and Vinyl Applied

Phase Three

Lamar Graphics is now offering INSTALL READY EXTENSION KITS. These kits come with the vinyl copy pre-applied – completely eliminating the time required to apply the vinyl in your shop. You just unpack, assemble and install!

The Install Ready Extensions are finished using a commercial grade double sided adhesive which is applied using our industrial flatbed laminator. This machine assisted application process ensures a smooth and even surface during the application resulting in better adhesion than the previously used roll-on liquid adhesives.

The extension kit panels are designed to fit in FedEx freight boxes. Each panel is individually wrapped to minimize any damage or scratches during shipping. Just unbox, assemble, lift and secure!

QUESTIONS?

Structure types may vary, so modifications to these kits may be required. Please contact Charlie Peek (cpeek@lamar.com) or 225.923.3113 with questions regarding installation on nonstandard structures.
